

Mohamed Ibrahim Ghazi

Full Stack .NET Developer

✉ moibrahime697@gmail.com ☎ +20 1096209741 📍 Cairo, Egypt 🔗 mohamed-ibrahim 🌐 Mhmdibrahime

Professional Summary

Full Stack .NET Developer with 2+ years of professional experience building scalable web and enterprise applications using ASP.NET Core, C#, SQL Server, React, and modern cloud technologies. Experienced in software architecture, API development, performance optimization, payment integrations, and leading distributed development teams. Currently working with Egyptian and Saudi software companies while delivering freelance solutions for international clients.

Professional Experience

Full Stack .NET Developer, East Kodia - Develop and maintain scalable web applications and RESTful APIs using ASP.NET Core, EF Core, SQL Server, and React. - Collaborate with cross-functional teams to deliver enterprise-grade software solutions following Agile/Scrum methodologies. - Design and implement secure authentication and authorization systems using JWT, ASP.NET Identity, OAuth, and Role-Based Access Control (RBAC). - Optimize application performance through database indexing, query tuning, caching strategies, and production monitoring. - Participate in code reviews, technical planning, architecture discussions, and CI/CD deployment pipelines using Azure DevOps and Git.	08/2025 – Present Hybrid Egypt
Backend .NET Developer (Part-Time), Saqr Al Bina Al Hadith - Develop and maintain backend services and APIs for internal business and operational systems using ASP.NET Core and SQL Server. - Design database structures, stored procedures, and integrations to support business workflows and reporting requirements. - Implement secure authentication, authorization, and API communication standards to ensure system reliability and data protection. - Collaborate remotely with stakeholders and project teams to gather requirements, deliver features, and resolve production issues. - Contribute to performance optimization, bug fixing, system maintenance, and deployment activities across multiple environments.	03/2026 – Present Remote Saudi Arabia
Trainee .NET Developer, Al Ahly Momkn for E-Payments Completed two internship periods contributing to production-level .NET applications, payment integrations, bug fixes, and performance enhancements.	09/2024 – 11/2025 Onsite Cairo, Egypt

Education

B.Sc. in Computer Science, Kafr Elsheikh University	06/2026
--	---------

Technical Skills

Languages & Frameworks C#, ASP.NET Core 9, .NET Web API, EF Core, JavaScript, jQuery, HTML5, CSS3, React, Bootstrap	API & Services RESTful API, SOAP, WCF, JWT, RBAC, ASP.NET Identity, OAuth (Google/Facebook), Swagger/OpenAPI, Rate Limiting, CORS, Response Compression, Webhook Handling
AI/ML & Documents ONNX Runtime, iText7 (PDF), DocuSign API	Testing & Quality Unit Testing, Code Reviews, Global Error Handling Middleware
Payments & Media Stripe, PayPal, Paymob, Casheir, Mux, Vimeo	Methodologies Agile / Scrum, Full Project Life-Cycle Management
Architecture & Design Clean Architecture, N-Tier, SOLID, OOP, Design Patterns, Repository Pattern, Unit of Work	Database SQL Server (Advanced), Oracle (familiar), Stored Procedures, Indexing & Query Optimization, Data Migration
Cloud & DevOps Microsoft Azure, Azure DevOps, Git, TFS, CI/CD, Hostinger, SmarterASP.NET, MonsterASP.NET, Production Monitoring	Performance SignalR, In-Memory / Distributed Caching, Query Optimization
Security SSL, HTTPS Enforcement, DNS Management, File Upload Security	

Selected Projects

Solar FusionAI , <i>Renewable Energy ERP (Graduation Project)</i> - Stack: ASP.NET Core 8 Web API, C#, EF Core, SQL Server, JWT, ONNX Runtime, Hangfire, MailKit, SignalR, Swagger/OpenAPI, Google & LinkedIn OAuth, React - Developed a map-integrated customer platform where users submit installation proposals using geolocation indexing, roof area measurements, and property characteristics. - Integrated ONNX Runtime to execute multiple machine learning models predicting daily/hourly solar generation, consumption patterns, battery charge times, and panel lifespan estimation. - Built an automated admin dashboard workflow that dispatches interactive emails with embedded Accept/Reject buttons, allowing users to approve proposals and proceed to payment without redirection. - Engineered a secure identity system utilizing JWT and Google/LinkedIn OAuth, supported by Hangfire background workers managing scheduled daily tasks and data state refreshes.	02/2026 – 06/2026
TRADO  , <i>Trading & Investment Platform</i> - Stack: ASP.NET Core 9, C#, EF Core, SQL Server, JWT, DocuSign API, ONNX Runtime, iText7, Swagger/OpenAPI, Google OAuth, Rate Limiting, React - Full-stack trading and investment platform with AI-powered analysis (ONNX Runtime), DocuSign e-signature workflows, automated PDF reports via iText7, and a React frontend.	03/2026 – 05/2026
Razana  , <i>E-Commerce Platform</i> - Stack: ASP.NET Core 9, C#, EF Core, SQL Server, JWT, RBAC, Swagger/OpenAPI, Newtonsoft.Json, File Upload, Global Error Handling, Rate Limiting, Caching - Production-ready e-commerce REST API with role-based authorization, global error middleware, file upload management, and full Swagger documentation.	02/2026 – 03/2026
BawabaUNI  , <i>University Portal</i> - Stack: ASP.NET Core Web API, SQL Server, JWT, EF Core, Vimeo, Paymob - Comprehensive Arabic/English university guide for Egyptian students with online courses, video streaming via Vimeo, and Paymob payment integration.	01/2026 – 02/2026
KSN-SAS  , <i>E-Commerce Website</i> - Stack: ASP.NET Core Web API, SQL Server, JWT, EF Core, Next.js - Secure e-commerce platform built for an Italian client with product management, authentication, and a Next.js frontend.	08/2025 – 09/2025

Leadership & Volunteering

IEEE , <i>Head of Back-End Committee</i> Directed back-end projects and delivered .NET and REST API workshops for junior devs.	10/2024 – 05/2025
--	-------------------

Certifications

Full-Stack Web Developer (DEPI) – .NET Technology Jun 2024 – Dec 2024	Web Developer using React – ITI Jul 2025
---	--
